Sera Minori beef

These cattle are raised with love and care at "Minori Ranch" on the Sera plateau. The cattle are fattened in the blessed natural environment of Sera for more than half a year longer than usual, from one month to 25 months of age. The fat content, called "sashi," is just right, and the taste is unique to healthy cattle.

Sera Kogen Pork

"Setouchi Rokkokuton" is produced at four farms in the prefecture, including Sera Kogen, based on the HACCP production system recommended by Hiroshima Prefecture, and is raised on feed consisting mainly of six kinds of grains (corn, milo, rice, barley, wheat, and soybeans), which gives the pork a sweet, light aftertaste.
 (※Sera Kogen Pork is the pork raised on a farm in Sera among the "Setouchi Rokkokuton".)
